Profile Summary

Python Full Stack Web Developer with 1.1 years of experience in designing and developing scalable web applications using Python, Django, Django REST Framework, MySQL, HTML, CSS, and JavaScript. Expertise in creating secure, production-ready e-commerce and business websites with authentication, RESTful APIs, responsive frontends, and optimized database architecture. Proficient in translating business requirements into efficient solutions, debugging, testing, and collaborating with cross-functional teams to deliver high-performance systems. Dedicated to clean code practices and scalable architecture, ensuring maintainable and robust software solutions aligned with industry standards.

Skills

Python | Django | Django REST Framework | REST API | MySQL | HTML | CSS | JavaScript | Git | GitHub | MVT | CRUD | Authentication

Work Experience

Python Fullstack Developer – Pretute Web Solution (Mar 2025 - Apr 2026)

- Developed dynamic and responsive web applications utilizing Django, Django REST Framework, MySQL, JavaScript, HTML, and CSS.
- Engineered backend logic and designed robust RESTful APIs to support frontend functionalities.
- Implemented authentication, authorization, and comprehensive user management modules.
- Optimized complex database queries to enhance application performance and scalability.
- Managed end-to-end feature development encompassing requirement analysis, bug resolution, rigorous testing, deployment, and ongoing maintenance.

Projects

Medical E-Commerce Web Application (1 Months)

- Developed a full-stack Medical E-Commerce platform leveraging Django and MySQL, with a responsive frontend built using HTML, CSS, and JavaScript.
- Implemented comprehensive product catalog, category management, advanced search, and dynamic filtering functionalities.
- Engineered secure authentication and role-based authorization systems for both users and administrators.
- Designed and integrated shopping cart, order processing, and real-time inventory management features.
- Optimized database queries and crafted responsive UI to enhance performance, scalability, and user experience.

Multi-Website Development (1 Weeks)

- Developed multiple responsive websites by integrating Django backend with MySQL databases to ensure robust functionality and data management.
- Implemented secure login and signup workflows incorporating comprehensive frontend and backend validation for enhanced user authentication.
- Executed full CRUD (Create, Read, Update, Delete) operations with synchronized frontend-backend interactions to maintain data integrity.
- Integrated frontend interfaces with RESTful backend APIs and database systems to deliver seamless user experiences and efficient data communication.

Education

B.Tech | Electrical and Electronics Engineering (EEE) | Dr. APJ Abdul Kalam Technical University, Lucknow | Marks - 71% | 2023
Diploma | Electronics Engineering | Board of Technical Education, Lucknow | Marks - 68% | 2019
10th | UP Board | Marks - 81% | 2016

Extra-curricular Activities

Web Development Projects

Worked on multiple academic and personal web projects including e-commerce and standard business websites demonstrating end-to-end full stack development skills.

Additional Information

Hobbies: Reading Novels

Languages: English, Hindi
